Professional Experience

Hiberus	Morocco (Remote)
SENIOR SOFTWARE ENGINEER	August 2025 – present
- Design, Develop and maintain Havas Converged Hub suite using microfrontends and event-driven microservices with asynchronous messaging. - Create, manage and optimize Gitlab CI/CD pipelines to streamline development workflows and ensure smooth application delivery. - Ensure high code quality through peer reviews, best practices, and by facilitating a weekly Technical Sync meeting. - Lead daily Scrum and sprint refinement sessions, estimated user stories, and challenged acceptance criteria to drive Agile delivery. - Conduct demos of new features to clients and stakeholders, highlighting technical implementations and business impact.	
Tech stack: Java 17, Angular 16/20, Spring 3, Oracle 19c, RabbitMQ, Gitlab CI, SonarQube, OpenTelemetry, Jaeger.	
Orange Business Services	Casablanca, Morocco (hybrid)
SOFTWARE ENGINEER	May 2024 – August 2025
- Integrated, maintained, and deployed 3 microfrontend remote applications dynamically into a host application using Webpack and Module Federation. - Implemented unit tests using JUnit/Mockito for Spring Boot and Jest for Angular, and refactored code, increasing SonarQube coverage from 53% to 88%. - Led daily stand-ups and contributed to on-call support and ensure high code quality through reviews and best practices, within an Agile/SAFe environment. - Designed and developed responsive user interfaces using Stencil and Storybook. - Implemented and tested Proof of Concepts to assess performance and integration of new features in a microfrontend architecture.	
Tech stack: Java 17, Angular 17/20, Spring 3, Stencil, Storybook, Gitlab, Docker, Kubernetes, SonarQube.	
Capgemini Technology Services	Casablanca, Morocco (hybrid)
SOFTWARE ENGINEER	February 2023 – May 2024
- Developed and maintained a Java based event driven data pipeline using Apache Kafka, reliably processing thousands of events across 3-broker production cluster. - Implemented security with Keycloak server and OAuth 2.0 protocol for multiple microservices through the Spring Cloud Gateway. - Designed and Developed user interfaces with Figma and Angular. - Created a real-time interactive admin dashboard in Kibana to collect insights and users behavior.	
Tech stack: Java 17, Angular 16, Spring, Apache Kafka, PostgreSQL, Elastic Search, Docker, Kubernetes, Gitlab, Agile/SAFe, Keycloak.	
ECS Informatique - Software Engineer	Rabat, Morocco (Onsite)
DEVELOPMENT OF A WEB APPLICATION FOR GEOLOCALIZATION AND REAL-TIME TRACKING OF PERSONAL VEHICLES	March 2022 – September 2022
- Built a Spring Boot backend application for GPS coordinate geolocalization captured by GPS trackers. - Ingested data from different GPS sensors' metadata and integrated them into an internal Oracle database. - Created a frontend application with React to consume the REST APIs to display maps of tracked vehicles with an internal admin dashboard.	
Tech stack: Java, Angular 15, Spring Boot, Angular Material, Figma, Docker, Github, Agile.	

Skills

Languages	English (Advanced), French (Advanced), Arabic (Native), Amazigh (Native).
Programming languages	Java, Typescript, JavaScript, Python.
Frameworks and Libraries	Spring, Quarkus, Angular, React, Kafka, AKHQ, ELK Stack, Node.js, Hibernate, JPA, Bootstrap, Storybook.
Databases and Tools	PostgreSQL, Oracle, MySQL, Redis, Elasticsearch, Liquibase, DBeaver.
APIs	SOAP, REST, GraphQL, Swagger (OpenAPI), Postman, Bruno.
Testing and Quality	JUnit, Mockito, Jest, Cypress, WireMock.
Security	Spring Security, Keycloak, OAuth 2, JWT, Vault, ClamAV.
Cloud and DevOps	Docker, Kubernetes, Git, GitLab CI, Jenkins, SonarQube, Linux (Ubuntu, NixOS).
Deployment	Vercel (CI/CD, custom domain, HTTPS)
Microservices	API Gateway, Consul/Eureka, OpenFeign, Circuit Breaker, Saga Pattern, Prometheus, Grafana, OpenTelemetry.
AI	Spring AI, LLM API integrations, n8n Workflow Automation
Project Management	Agile (Scrum/SAFe), Waterfall, Jira, Confluence, Notion.
Certifications	SAFe® 6 Certified Practitioner, Certified Kubernetes Application Developer - CKAD (in progress)

Education

Faculty of Science and Technology (FST)	Mohammedia, Morocco
SOFTWARE ENGINEER IN MATHEMATICS AND COMPUTER SCIENCE	2019 - 2022
Relevant Courses : JEE, Spring Boot, Java, Python Programming, Angular, Algorithms, Data Structures, POO, Algorithm Analysis, Complexity, Database management (Oracle), Cryptography, Machine Learning, Optimization, English.
